

TASK 10

date: 14/10/2025

CRUD Operations in document databases

Aim:- to perform mongoose using Npm design on mongo db designing document+database and performing koo operations like creating inserting querying finding and removing.

Steps:-

Step 1:- Install mongo db using following link

<https://www.mongodb.com/tutorials/download-community>

Step 2: To add the mongo db shell binary's location to your path environment variable open the Control panel.

In the system and security category click system

Step 3: open mongo and Security Category

click ok

Open mongo shell 4. done: | program files | mongo db | server | from | mongod.exe

Step 4: type the Crawl (create read update delete) commands given in text file.

CRUD operations:

```
db.createCollection("my lab")
```

```
done;
```

```
→ db.my lab insertOne ( { item: "Canvas",  
qty: 100, tag: 1;
```

```
( Cotton ), size { h: 25, w: 35, dam: 44 }
```

```
{
```

```
" acknowledged": true;
```

```
" inserted Id": ObjectId("627d13ac")
```

```
}
```

```
> db.my lab find ( { item: "Canvas" }
```

```
{ "_id": ObjectId("627d13acc7399015" item:
```

```
"Canvas", "qty" > db.my.insertMany([item:
journal", qty: 25, tags: ("blank", "led")
d
"acknowledged": true
```

```
"insertId": {
```

```
objectId("627d1598c73990")d}
```

```
objectId("627d1598c73990")d}
}
```

```
} > db.myLab.find(d) & item; 1, qty; 14)
```

```
d["_id": objectId("627d13acc73990")d, 62
973"] "item:
```

```
Canvas", "qty"; 100}
```

```
d["_id", objectId("627d13acc73990")d, 627d13acc73990)
"item"
```

```
Canvas", "qty"; 21}
```

```
{ "_id": objectId("627d13acc73990")d, 627d13acc73990)
"item" Canvas", qty; 85}
```

```
"_id": objectId("627d13acc")d;
```

```
"_id": objectId("627d13acc")d;
```

```
"item": "Canvas",
```

```
"qty": 100
```

```
}
```

```
{ "_id": objectId("627d1598c")d
```

```
"item": "journal")
```

```
"qty": 25
```

```
}
```

```
d["_id": objectId("627d1598c73990")d, "item":
"mat"
```

```
"qty": 85}
```

```
"_id": objectId("627d1598c")d
```

"qty": 25

> dbmy lab.find (item: "Canvas")

{
 "_id": ObjectId("627d13acc")

"item": "Canvas"

"qty": 100;

"tags": [

"Cotton":

]

"size": 28

"h": 28

"w": 35.5

"worm": "cm"

}

}

> dbmy lab.delete one (item: "Journal")

> dbmy lab.find (item: "Journal")

{
 "_id": ObjectId("627d13ac")

"item": "Canvas"

"qty": 100

}

"item": "Journal"

{
 "_id": ObjectId("627d13ac")

"item": "mat"

}

Result:

The implementation of crud operations like creating
inserting, finding and removing operation
using mongo cli successfully executed.
